

80% of utility invoices contain Errors and Overcharges!

Why Do You Need a Utility Audit?

Many of today's companies fail to realize the importance of auditing utility and telecommunication budgets and the accompanying monthly charges. Too often spending in this category is not verified due to an assumption of accuracy and cost efficiency. We often hear "as long as it looks right, we pay them." The utility company's position is that it is your responsibility to verify your bills. By assuming your bills are correct or there is nothing you can do leaves your company vulnerable to errors and overcharges. An audit may be the best thing you can do now, with the potential of refunds and savings going straight to your bottom line.

You have no upfront fees or any out of pocket cost to be sure what you are paying is 100% accurate.

We only need a few simple agreements signed and 1 month's copy of electric, natural gas, water, sewer, telecom, internet, cable, wireless and trash invoices. (Propane if used.)

Our results are always true and uncontested!

Complete detailed auditing report.

Monthly utility spend of \$8000.00 per mo. for profit business and \$6000.00 per mo. spend for non-profits.
