

Case Study: Erievew Metal Treating

Our Customer

Since 1961, Cleveland-based Erievew Metal Treating Co. has offered a broad range of standard and specialty finishes including organic coatings. Erievew can meet the toughest industry specifications for fasteners, stampings, die cast parts, machined parts and cold formed parts.

Project Snapshot

Annual Usage:

⚡ 3,500,000 kWh

🔥 50,000 Dth

Annual Savings
\$41,500

Price

Opportunity

Erievew Metal Treating was directly under contract with one supplier for their electricity and natural gas needs. With limited time to dedicate to shopping their energy spend around to multiple suppliers, Erievew was depending solely on one supplier for the most competitive pricing.

Solution

Through Navigate Power's competitive bid process & aggressive shopping of over 50 energy providers, we implemented a 5-year price protected electricity contract and a 3-year price protected gas contract that saves the client over \$40,000 per year. Working with an energy consultant not only provides a comprehensive analysis of available pricing options but ensures security knowing you have a trusted partner for years to come.
