

# ENPOWERED

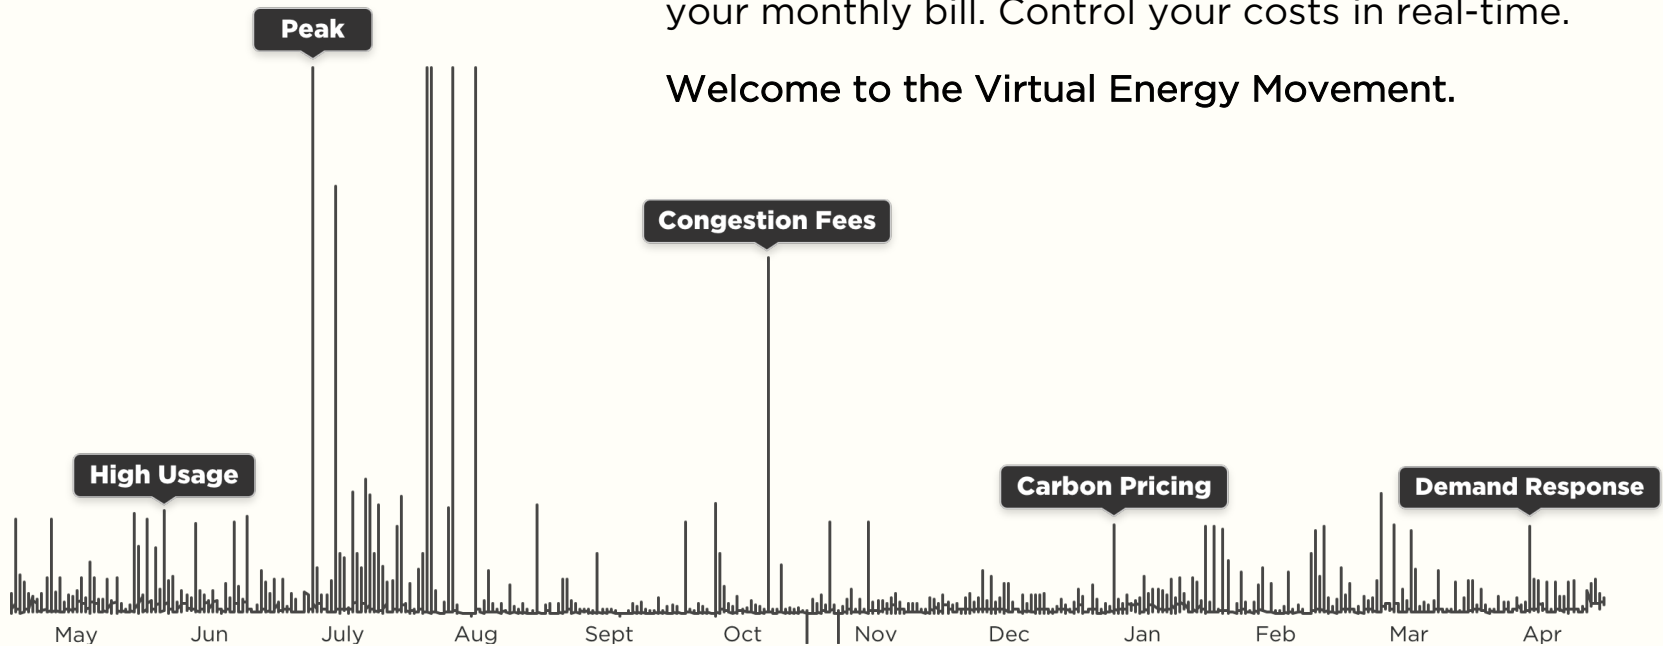

Energy is complicated and costs are rising.

Energy costs are complicated. It's hard to know what drives up your bill - usage, taxes, tariffs, congestion, demand fees, or more. What is more difficult to understand, is *when* are you charged for these?

Stop monitoring the market for peaks or waiting for your monthly bill. Control your costs in real-time.

Welcome to the Virtual Energy Movement.

# ENPOWERED

Connecting assets and markets.

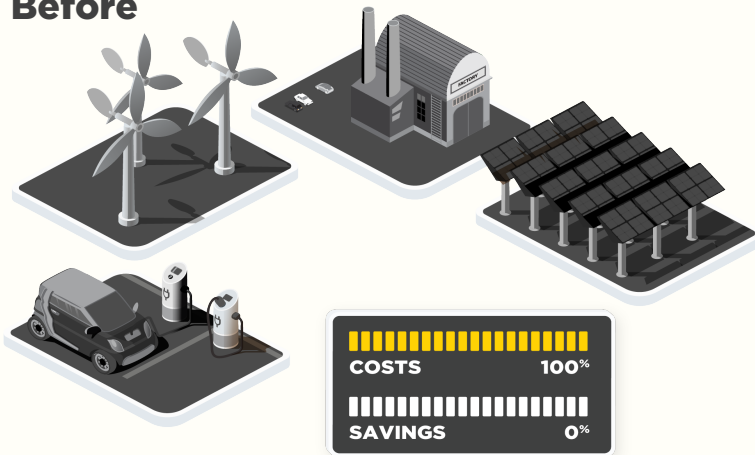

Beyond energy efficiencies. Real-time control. Time usage with real-time electricity markets.

Stop monitoring for events, peaks, or price spikes. Connect energy assets or automation systems to EnPowered and when events are detected EnPowered sends software signals to said systems to regulate usage and avoid expensive or carbon intense events.

Get EnPowered to improve ROI, lower costs, reduce emissions - automatically.
