

HOW IT WORKS:

1. We custom engineer and design an optimum energy-efficiency solution.
2. We purchase and install the highest quality energy-efficient equipment, while giving you a share of the savings.
3. We guarantee performance and resolve issues at no cost to you for the entire term (typically 3-10 years).
4. At the end of the term, you keep the equipment and 100% of the savings.

Example of an ESaaS project Before and After

Ideal solution for hotels, commercial real estate portfolios, industrial, healthcare, schools, municipal buildings, multi-site facilities, restaurants, grocery stores, and other energy-intensive buildings.
