

Benefits of LED

Today, light can do so much more than brighten our path. It can not only lighten our impact on the environment, but also make our parking lots more secure, and boost the productivity of our workspaces. Innovative LED lighting solutions help business owners make a powerful impact on their energy and cost savings.

Economic: Save Money

- Reduce energy costs by up to 80%
- Extended life cycle of 50,000 hours or more
- Durable and resistant to breakage

Operational: Save Time

- Instantaneous - 100% brightness immediately
- Controllability - dimmable to within 0.50% of light output
- Rapid cycling - lifespan is unaffected by switching on and off
- High performance - extreme cold temperatures

Environmental: Impact the Planet

- Illuminate without the toxic mercury found in Fluorescent and CFL
- Emit zero IR or UV radiation
- Reduce CO2 emissions
