- ✓ Google Analytics Setup

### Step 1 - Analyze Your Website

We take a look at your website to understand what you currently have going on and what we can do to improve it. All the features you see listed above will be checked and optimized.

### Step 2 - Keywords Research

We will research the keywords you would like to rank for and/or we will research keywords we believe will work for you. We will then recommend the keywords we think you should go after according to how many people search for those words and how competitive that keyword is among other websites.

### Step 3 - Website Page Optimization

We will take the keywords selected in the Step 2 and properly implement them into your website.

### Step 4 - Code Optimization

We will look at the code that runs your website and make any adjustments we see necessary to help you rank better for your selected keywords.

### Step 5 - Reporting on Rankings

We will provide you a monthly report with monthly rankings, direction submissions, and backlink submissions.
